KHODANYCH MYKHAILO
Javascript Developer

Hi. My name is Misha.From 2019 I was learning web development, (front-end) by myself. I read a lot of books, magazines, articles to have some knowledge. I enjoyed that process very much, because I always was interested in technology .So my entering into the world of technology started with buying courses.

During my study, I learned many interesting and useful information which now I can use in my work. I have some experience in front-end developing, back-end and data-base.

Amongst my strong skills, there is the professionalism and the high motivation that I am ready to prove to you day by day. Moreover, I continuously strive for self-development, set ambitious goals, and do my best to achieve them.

Experience

Company: **HuntMe**

Duration: 09.2020 - present

Role: **Front-End developer (Angular 2+)**

Description:

Company: **Volunteer projects**

Duration: 08.2020 - 10.2020

Role: **Backend developer (NodeJs)**

Description: It wasn't a full time job. I have worked on a backend position. Mostly I had to download a file from the internet and parse it, also to save this information to the database. In addition, I have written tests for it.

School: **Logos It Academy**

Duration: 03.2019 - 2020

Course: **Front-end developer**

Description: During the course I learned new technology like a HTML/CSS, Js, Angular, MySql, Git. I successfully made my homework. It was a good experience for me.
